Post Graduate Certification in Python and Ruby on Rails

Under the Guidance of,

Jayant V.

Technical Trainer

EduBridge

(School of coding)

Introduction:

DressUp allows people to buy and sell physical goods, services, and digital products over the internet rather than at a brick-and-mortar location. Through this website, a business can process orders, accept payments, manage shipping and logistics, and provide customer service.

Our Project Include **Modules:-**

- Admin Module
- User Module
- Cart Module

I have developed this Application in **Python and Django**. It's a web-based projects so I have used **HTML, CSS, JavaScript and Bootstrap also**.

The main feature of the project is to make shopping easier. You can access this website from anywhere and everywhere.

In Admin module, admin can add the Category and Products in the specific category. He can also view the total number of users at present in the website. And category and product details also. Admin can only see the admin page and cart if he wants to order something.

In User module, user can access the website and buy products and products to cart and buy and shuffle by category. New user can register and login after that to shop. In Cart, admin and user both can access, they can add the products and buy if they want.

Software Requirements:

Front end: HTML, CSS, JavaScript, Bootstrap.

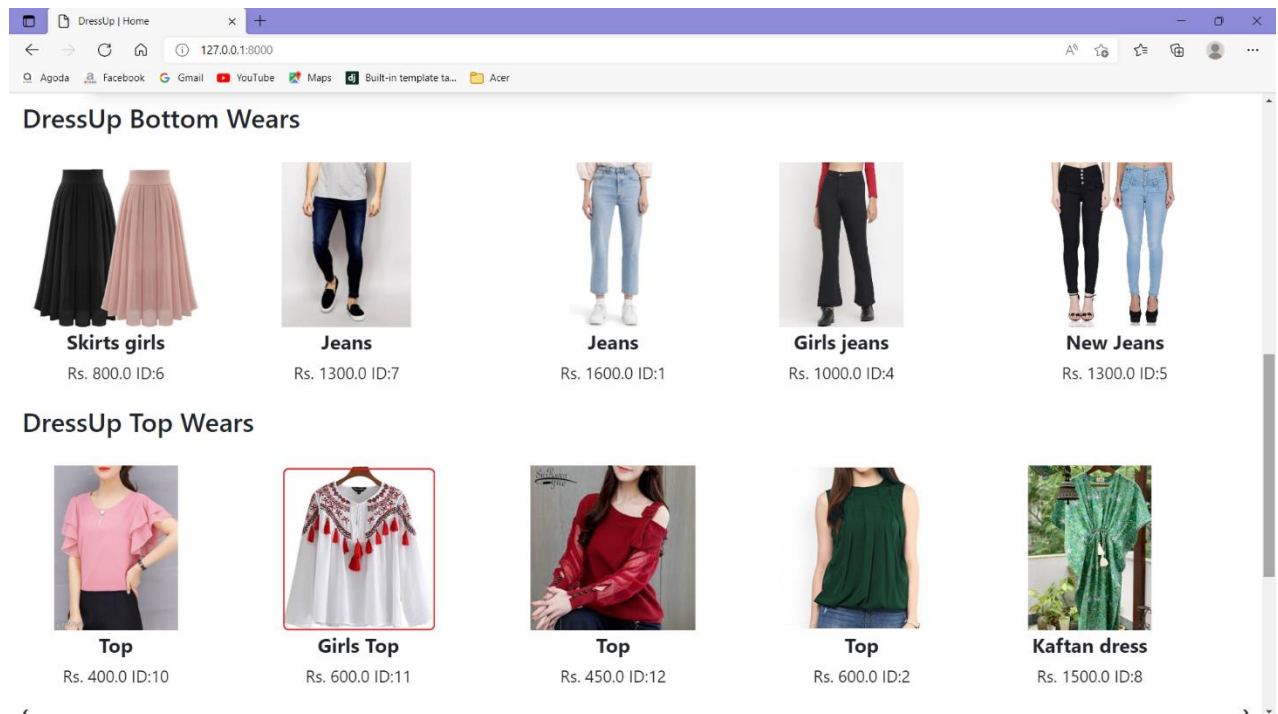

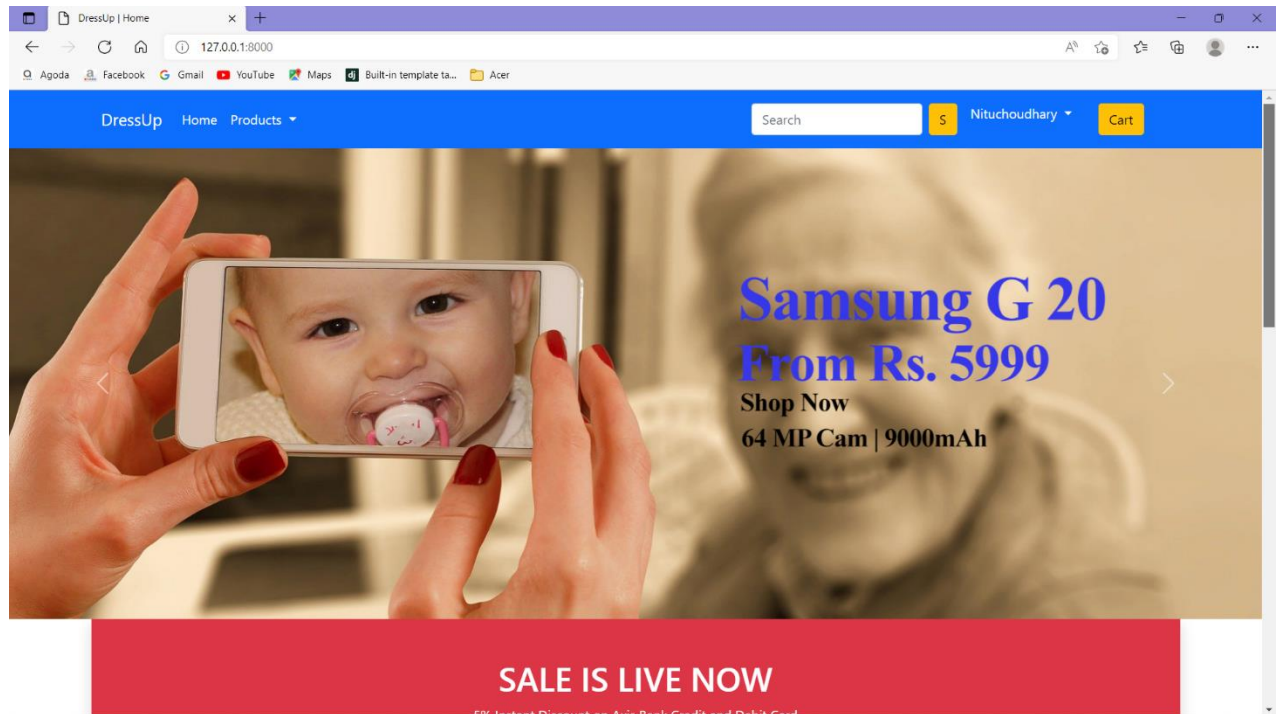

Back end: Python, Django.

Browser: Best result on Google Chrome

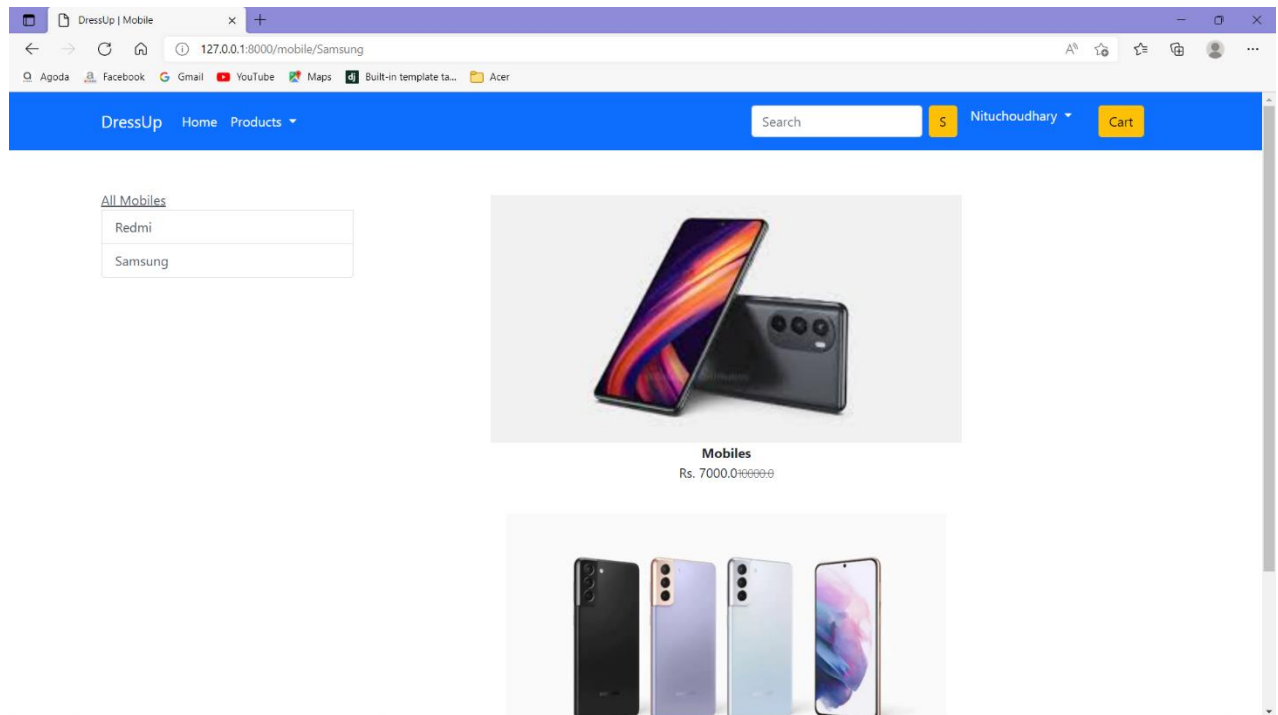

Operating System: Window 10

The screenshot shows a web browser window with the address bar displaying '127.0.0.1:8000/registration/'. The browser's taskbar at the bottom includes icons for Agoda, Facebook, Gmail, YouTube, Maps, and a folder named 'Acer'. The website's header is blue and contains the 'DressUp' logo, a 'Home' link, a 'Products' dropdown menu, a search bar, and buttons for 'Login' and 'Registration'. The main content area is titled 'Customer Registration' and features a white registration form with a green success message at the top: 'Congratulations!! Registered Successfully'. The form fields are as follows:

- Username:** A text input field containing the name 'Neha'.
- Email:** A text input field containing the email address 'neha@gmail.com'.
- Password:** An empty text input field.
- Confirm Password:** An empty text input field.

Below the form fields is a blue 'submit' button. At the bottom of the form, there is a link that reads 'Existing User? [Login Now](#)'.
